INDEX TO VOL. LXXXIV. (B)

Acetylmethylcarbinol, bacterial production of (Harden and Norris), 492.
Acquired characters, investigation of instance of transmission of (Brown), 555.
Address of the President (Geikie), 435.
Adsorption as preliminary to chemical reaction (Bayliss), 81.
Agglutination, factors concerned in (Dean), 416.
Alcyonaria, type of new family of (Hickson), 195.
Amakebe, transmission by *Rhipicephalus* (Theiler), 112.
Antelope infected with *Trypanosoma gambiense* (Fraser and Duke), 484.
Arber (E. A. N.) On the Fossil Flora of the Forest of Dean Coalfield and the Relationships of the Coalfields of the West of England and South Wales, 543.
Armstrong (H. E. and E. F.) The Origin of Osmotic Effects. IV.—Note on the Differential Septa in Plants with reference to the Translocation of Nutritive Materials, 226 ; —— and Horton (E.) Herbage Studies. I.—*Lotus corniculatus*, a Cyanophoric Plant, 471.
Astrosclera willeyana, Lister, note on (Kirkpatrick), 579.

Bacillus cloacæ, chemical action of, on glucose, etc. (Thompson), 500.
Bacteria, influence of ionised air on (Thornton), 280.
Bacterial and other cells, method of disintegrating (Barnard and Hewlett), 57.
Barnard (J. E.) and Hewlett (R. T.) On a Method of Disintegrating Bacterial and other Organic Cells, 57.
Barratt (J. O. W.) Fractional Withdrawal of Complement and Amboceptor by Means of Antigen (Preliminary Note), 277.
Bateson (W.) See Vilmorin and Bateson ; —— and Punnett (R. C.) On the Interrelations of Genetic Factors, 3.
Bayliss (W. M.) The Properties of Colloidal Systems. II.—On Adsorption as Preliminary to Chemical Reaction, 81 ; —— III.—The Osmotic Pressure of Electrolytically Dissociated Colloids, 229.
Beddoe (J.) Obituary notice of, xxv.
Blood, action of radium on constituents of (Chambers and Russ), 124 ; —— new method for total volume of (Todd and White), 255.
Blood corpuscles, fate of red, injected into circulation, etc. (Todd and White), 255.
Blood volume of mammals and relation to surface area of body (Dreyer and Ray), 460.
Bottomley (W. B.) The Structure and Physiological Significance of the Root-nodules of *Myrica gale*, 215.
Boyce (Sir R.) Obituary notice of, iii.
Brain, motor localisation in gibbon's (Mott, Schuster, and Sherrington), 67.
Brown (T. G.) The Intrinsic Factors in the Act of Progression in the Mammal, 308 ; —— An Alleged Specific Instance of the Transmission of Acquired Characters.—Investigation and Criticism, 555.
Bruce (Sir D.) The Morphology of *Trypanosoma evansi* (Steel), 181 ; —— The Morphology of *Trypanosoma gambiense* (Dutton), 327.
Buchanan (G.) Note on Developmental Forms of *Trypanosoma brucei* (*pecaudi*) in the Internal Organs, etc., of the Gerbil (*Gerbillus pygargus*), 161.
Buckmaster (G. A.) and Gardner (J. A.) Ventilation of the Lung during Chloroform Narcosis, 347.

Cancerous ancestry and cancer incidence in mice (Murray), 42.
Carbon assimilation, mechanism of (Usher and Priestley), 101.
Carcinoma, viability of human, in animals (Williams), 191.
Caulfeild (A. H.) Factors in the Interpretation of the Inhibitive and Fixation Serum Reactions in Pulmonary Tuberculosis, 373; —— Preliminary Report upon the Injection of Rabbits with Protein-free (Tuberculo-) Antigen and Antigen-Serum Mixtures, 390.
Ceratopora, a new family of Alcyonaria (Hickson), 195.
Chambers (H.) and Russ (S.) The Action of Radium Radiations upon some of the Main Constituents of Normal Blood, 124.
Chloroform narcosis, ventilation of lung during (Buckmaster and Gardner), 347.
Cholesterol, origin and destiny of. VIII.—In liver of rabbits under various diets (Ellis and Gardner), 461.
Circulatory apparatus, distribution of soluble substances in frogs deprived of (Meltzer), 98.
Coalfield, fossil flora of Forest of Dean, and relation of West of England and South Wales fields (Arber), 543.
Colloidal systems, properties of (Bayliss), 81.
Colour contrast, simultaneous (Edridge-Green), 546; —— discrimination of (Edridge-Green), 116.
Complement and amboceptor, withdrawal of, by means of antigen (Barratt), 277.
Cousin marriage, inbreeding in a Mendelian population with special reference to (Jacob), 23.
Cushny (A. R.) On the Action of Senecio Alkaloids and the Causation of Hepatic Cirrhosis in Cattle (Preliminary Note), 188.

Darwin (F.) and Pertz (D. F. M.) On a New Method of Estimating the Aperture of Stomata, 136.
Dean (H. R.) On the Factors concerned in Agglutination, 416.
Douglas (C. G.) and Haldane (J. S.) The Causes of Absorption of Oxygen by the Lungs in Man (Preliminary Communication), 1.
Dreyer (G.) and Ray (W.) Further Experiments upon the Blood Volume of Mammals and its Relation to the Surface Area of the Body, 460.
Duke (H. L.) See Fraser and Duke.

Echinus and *Echinocardium*, effects of crossing (MacBride), 394.
Edridge-Green (F. W.) The Discrimination of Colour, 116; —— Simultaneous Colour Contrast, 546.
Electric charges of living cells (Hardy and Harvey), 217.
Electrical effects accompanying decomposition (Potter), 260.
Ellis (G. W.) and Gardner (J. A.) The Origin and Destiny of Cholesterol in the Animal Organism. Part VIII.—On the Cholesterol Content of the Liver of Rabbits under Various Diets and during Inanition, 461.
Enteritis of bovines, preparation of diagnostic vaccine for pseudo-tuberculous (Twort and Ingram), 517.
Eye, sensibility to variations of wave-length (Watson), 118.
Eye media of Australian animals (Jona), 345.

Fantham (H. B.) *Herpetomonas pediculi*, nov. spec., parasitic in the Alimentary Tract of *Pediculus vestimenti*, the Human Body Louse, 505.
Flack (M.) See Hill and Flack.
Fraser (A. D.) and Duke (H. L.) Antelope infected with *Trypanosoma gambiense*, 484.
Fry (W. B.) A Preliminary Note on the Extrusion of Granules by Trypanosomes, 79.

Galton (Sir F.) Obituary notice of, x.
Gametic coupling in *Pisum* (Vilmorin and Bateson), 9; —— —— and repulsion in *Primula* (Gregory), 12.
Gardner (J. A.) See Buckmaster and Gardner; Ellis and Gardner.
Geikie (Sir A.) Address at Anniversary Meeting, 1911, 435.
Genetic factors, inter-relations of (Bateson and Punnett), 3.
Goitre, experimental transmission from man to animals (McCarrison), 155.
Goodey (T.) A Contribution to our Knowledge of the Protozoa of the Soil, 165.
Gregory (R. P.) On Gametic Coupling and Repulsion in *Primula sinensis*, 12.
Guaiacum reaction given by plant extracts (Wheldale), 121.

Haldane (J. S.) See Douglas and Haldane.
Harden (A.) and Norris (D.) The Bacterial Production of Acetylmethylcarbinol and 2.3-Butylene Glycol from Various Substances, 492; —— and Paine (S. G.) Action of Dissolved Substances upon the Autofermentation of Yeast, 448.
Hardy (W. B.) and Harvey (H. W.) Note on the Surface Electric Charges of Living Cells, 217.
Harvey (H. W.) See Hardy and Harvey.
Hayden (A. F.) and Morgan (W. P.) An Inquiry into the Influence of the Constituents of a Bacterial Emulsion on the Opsonic Index, 320.
Hepatic cirrhosis in cattle, Senecio alkaloids and causation of (Cushny), 188.
Herbage studies. I.—*Lotus corniculatus* (Armstrong and Horton), 471.
Heredity, studies in (MacBride), 394.
Herpetomonas pediculi, n. sp., parasitic in alimentary tract of *Pediculus* (Fantham), 505.
Hewlett (R. T.) Immunisation by means of Bacterial Endotoxins, 49.
Hickson (S. J.) On Ceratopora, the Type of a New Family of Alcyonaria, 195.
Hill (L.) and Flack (M.) The Physiological Influence of Ozone, 404.
Horton (E.) See Armstrong and Horton.

Immunisation by bacterial endotoxins (Hewlett), 49.
Inbreeding in a Mendelian population, with reference to cousin marriage (Jacob), 23.
Infusorian micronucleus and regeneration (Lewin), 332.
Ingram (G. L. Y.) See Twort and Ingram.
Ionised air, influence on bacteria (Thornton), 280.

Jackson (J. H.) Obituary notice of, xviii.
Jacob (S. M.) Inbreeding in a Stable Simple Mendelian Population with Special Reference to Cousin Marriage, 23.
Jona (J. L.) The Refractive Indices of the Eye Media of some Australian Animals, 345.

Kennedy (R.) Experiments on Restoration of Paralysed Muscles by means of Nerve Anastomosis, 75.
Kirkpatrick (R.) Note on *Astrosclera willeyana*, Lister, 579.

Lewin (K. R.) The Behaviour of the Infusorian Micronucleus in Regeneration, 332.
Lotus corniculatus, a cyanophoric plant (Armstrong and Horton), 471.
Lungs, causes of absorption of oxygen by (Douglas and Haldane), 1.

MacBride (E. W.) Studies in Heredity. I.—The Effects of crossing the Sea-urchins *Echinus esculentus* and *Echinocardium cordatum*, 394.
McCarrison (R.) The Experimental Transmission of Goitre from Man to Animals, 155.
Mackenzie (K.) See Schäfer and Mackenzie.
Meltzer (S. J.) On the Distribution and Action of Soluble Substances in Frogs deprived of their Circulatory Apparatus, 98.

Milk secretion, action of animal extracts on (Schäfer and Mackenzie), 16.
Morgan (W. P.) See Hayden and Morgan.
Motor localisation in brain of gibbon (Mott, Schuster, and Sherrington), 67.
Mott (F. W.), Schuster (E.), and Sherrington (C. S.) Motor Localisation in the Brain of the Gibbon, correlated with a Histological Examination, 67.
Murray (J. A.) Cancerous Ancestry and the Incidence of Cancer in Mice, 42.
Mycobacterium enteritidis, &c., method of isolating and cultivating (Twort and Ingram). 517.
Myrica gale, structure, etc., of root-nodules of (Bottomley), 215.

Nerve anastomosis, restoration of paralysed muscles by (Kennedy), 75.
Norris (D.) See Harden and Norris.

Obituary Notices of Fellows Deceased :—
Ringer (S.), i.
Boyce (Sir R.), iii.
Galton (Sir F.), x.
Jackson (J. H.), xviii.
Beddoe (J.), xxv.
Opsonic index, influence of constituents of bacterial emulsion on (Hayden and Morgan), 320.
Osmotic effects, origin of (Armstrong), 226.
Osmotic pressure of electrolytically dissociated colloids (Bayliss), 229.
Ozone, physiological influence of (Hill and Flack), 404.

Paine (S. G.) The Permeability of the Yeast-cell, 289; —— see also Harden and Paine.
Paralysed muscles, restoration by nerve anastomosis (Kennedy), 75.
Pertz (D. F. M.) See Darwin and Pertz.
Plants, differential septa in, and translocation of nutritive materials (Armstrong), 226.
Potter (M. C.) Electrical Effects accompanying the Decomposition of Organic Compounds, 260.
Priestley (J. H.) See Usher and Priestley.
Progression in mammal, intrinsic factors in act of (Brown), 308.
Protozoa of soil, contribution to knowledge of (Goodey), 165.
Pulmonary tuberculosis, interpretation of serum reactions in (Caulfeild), 373.
Punnett (R. C.) See Bateson and Punnett.

Radium radiations, action upon blood constituents (Chambers and Russ), 124.
Ray (W.) See Dreyer and Ray.
Reflex inhibition of knee flexor (Sherrington and Sowton), 201.
Ringer (S.). Obituary notice of, i.
Root-nodules of *Myrica gale*, structure, etc. (Bottomley), 215.
Russ (S.) See Chambers and Russ.

Schäfer (E. A.) and Mackenzie (K.) The Action of Animal Extracts on Milk Secretion, 16.
Schuster (E.) See Mott, Schuster, and Sherrington.
Senecio alkaloids and hepatic cirrhosis in cattle (Cushny), 188.
Serum reactions in pulmonary tuberculosis (Caulfeild), 373.
Sherrington (C. S.) See Mott, Schuster, and Sherrington; —— and Sowton (S. C. M.) On Reflex Inhibition of the Knee Flexor, 201.
Soil, a contribution to knowledge of protozoa of (Goodey), 165.
Sowton (S. C. M.) See Sherrington and Sowton.

Stannus (H. S.) and Yorke (W.) The Pathogenic Agent in a Case of Human Trypanosomiasis in Nyasaland, 156.
Stomata, new method of estimating aperture of (Darwin and Pertz), 136.

Theiler (A.) Transmission of Amakebe by means of *Rhipicephalus appendiculatus*, the Brown Tick, 112.
Thompson (J.) The Chemical Action of *Bacillus cloacæ* (Jordan) on Glucose and Mannitol, 500.
Thornton (W. M.) The Influence of Ionised Air on Bacteria, 280.
Todd (C.) and White (R. G.) On the Fate of Red Blood Corpuscles when Injected into the Circulation of an Animal of the same Species; with a New Method for the Determination of the Total Volume of the Blood, 255.
Trypanosoma brucei (*pecaudi*), developmental forms of, in *Gerbillus pygargus* (Buchanan), 161; *T. evansi*, morphology of (Bruce), 181; *T. gambiense*, morphology of (Bruce), 327.
Trypanosomiasis in Nyasaland, pathogenic agent in (Stannus and Yorke), 156.
Tuberculo-antigen and antigen-serum mixtures, report on injection of rabbits with protein-free (Caulfeild), 390.
Twort (F. W.) and Ingram (G. L. Y.) A Method for Isolating and Cultivating the *Mycobacterium enteritidis chronicæ pseudotuberculosæ bovis*, Jöhne, and some Experiments on the Preparation of a Diagnostic Vaccine for Pseudo-tuberculous Enteritis of Bovines, 517.

Usher (F. L.) and Priestley (J. H.) The Mechanism of Carbon Assimilation. Part III. 101.

Vilmorin (P. de) and Bateson (W.) A Case of Gametic Coupling in Pisum, 9.

Watson (W.) Note on the Sensibility of the Eye to Variations of Wave-length, 118.
Wheldale (M.) On the Direct Guaiacum Reaction given by Plant Extracts, 121.
White (R. G.) See Todd and White.
Williams (C. L.) The Viability of Human Carcinoma in Animals, 191.

Yeast, action of dissolved substances on autofermentation of (Harden and Paine), 448.
Yeast-cell, permeability of (Paine), 289.

END OF THE EIGHTY-FOURTH VOLUME (SERIES B).

HARRISON AND SONS, Printers in Ordinary to His Majesty, St. Martin's Lane.
